

Things to consider...

- All recruiters value work experience, for many it is valued as highly as academic achievement <https://targetjobs.co.uk/careers-advice/career-planning/273051-the-top-10-skills-thatll-get-you-a-job-when-you-graduate> Experience will also help to inform your career decisions and help to increase your self-awareness so that you understand what you want from a career.
- If you haven't had the opportunity to gain experience up to this point, ***it is still not too late!*** and any experience will help you to demonstrate the skills that employers require.

- If you are unsure about making a career decision or do not know where to begin, the following resources which describe some of the typical careers destinations with a physics degree http://www.prospects.ac.uk/options_physics.htm

http://www.iop.org/careers/undergrad--postgrad/your-future/page_64487.html

You can also research the destinations of Warwick physics graduates at

<http://www2.warwick.ac.uk/services/scs/career/gradstats/> and the following links will help you to consider what you

want from a career and what may influence your choice <https://targetjobs.co.uk/careers-report>

<http://www.jobs.ac.uk/careers-advice/managing-your-career/1215/making-decisions-about-your-career>

- If you have a specific career aim or wish to find out more about a particular job sector or role connecting with a Warwick physics alumni may help to provide the insight and expertise that may increase your confidence.
